DETAILED ACTION

Page 2

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept **under PCT Rule 13.1**.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-20, 23, and 36, drawn to peptide comprising a first segment of SEQ ID NO: 1 linked to second segment having the sequence of SEQ ID NO:2 or a pharmaceutical composition comprising the peptide.

Group 2, claim(s) 26 and 28, drawn to a DNA, viral vector encoding the peptide of SEQ ID NO: 1 and 2

Group 3, claim(s) 31, drawn to an in vivo method of treating a subject suffering from cancer by administering to the subject the polypeptide.

Group 4, claim(s) 37, drawn to an in vitro method of inducing apoptosis of a cell that contains mutant p53 or over-expressed wild type p53 comprising the cell with the peptide of claim 1.

According to PCT Rule 13.2, unity of invention exists only when the shared same or corresponding technical feature is a contribution over the prior art. The inventions listed as group 1 and 2 do not related to s single general invention concept because the lack the same or corresponding special technical feature. The technical feature of group I are drawn to a polypeptide, which is shown by Vogelstein et al.,(US Patent 5527676) lack novelty or inventive step. Vogelstein et al teach the amino acid sequence comprising the peptide of SEQ ID NO1 or SEQ ID NO: 2 that is a fragment of P53 as evidenced by sequence result (attached). Therefore, the invention Group II do not make

a contribution over the prior art. Because the antibody for calreticulin is known in the art, the technical feature of the Group II is not a special technical feature, the unity of invention (Group I- III) is lacking.

The additional method of group 4 does not correspond to the main invention, as they are neither a method of making, nor a method of using said composition.

Therefore, the group is not considered to share a special technical feature with the main invention within the meaning of PCT Rule 13.2, and thus do not relate to a single invention concept within the meaning of PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lei Yao, Ph.D. whose telephone number is 571-272-3112. The examiner can normally be reached on 8am-6.00pm Monday-Thursday.

Any inquiry of a general nature, matching or file papers or relating to the status of this application or proceeding should be directed to Kim Downing for Art Unit 1642 whose telephone number is 571-272-0521

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Helms can be reached on 571-272-0832. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
